ICT4D & EDTECH SKILLS

Field Technology Deployment

mWater Platform (Data Collection)

Low-Resource Device Deployment

Multi-Site Field IT Coordination

End-User Training & Coaching

Pre-Submission QA & Validation

Device & Systems Management

Microsoft Intune (MDM)

Entra ID (Azure AD) / RBAC

Device Provisioning & Config

Microsoft 365 & SharePoint

Google Workspace

Connectivity & Networking

LAN · WLAN · VPN

TCP/IP · DNS · DHCP

Network Troubleshooting

ISP Liaison & Restoration

Documentation & Reporting

Implementation Reports & Briefs

Training Materials & Manuals

Meeting Minutes & Concept Notes

Monitoring Trackers & KPIs

CERTIFICATIONS

ICT for Development professional with experience bridging enterprise IT and field-based humanitarian technology. Proven track record in deploying digital tools in low-resource environments, training and coaching non-technical users, coordinating multi-site field operations, and producing implementation documentation that supports programme continuity. Familiar with Rwanda's digital policy landscape and experienced in working within government-aligned data systems. Available from 3 June 2026.

Experience

ICT for Development Professional Assistant

May 2025 – Present

WaterAid Rwanda · Kigali

- Led the ARMANI Endline Assessment field technology deployment in Bugesera District: configured the mWater data collection platform, trained 50+ field enumerators across multiple sites, and conducted pre-submission quality assurance demonstrating the full deployment-to-validation cycle required in school-based EdTech programmes
- Managed device provisioning, enrollment, and endpoint configuration using Microsoft Intune (MDM), ensuring secure, policy-compliant device management across a distributed workforce directly applicable to school device deployment and management workflows
- Administered Microsoft 365, Entra ID (Azure AD), and SharePoint: user lifecycle management, RBAC access controls, licensing, and security configurations providing the systems administration foundation required for managing school connectivity data and monitoring platforms
- Deployed and embedded Microsoft Copilot across the organisation: from technical configuration through to department-level training, coaching, and adoption support — reflecting the teacher-use integration model described in the role's EdTech objectives
- Built SharePoint-based digital collaboration platforms integrating M365 workflows to support remote and field-based teams demonstrating practical experience designing low-overhead digital infrastructure for distributed users
- Maintained LAN and network availability across Kigali office and field sites, liaising with ISPs on connectivity restoration — directly relevant to school connectivity monitoring and troubleshooting responsibilities
- Produced technical guides, user manuals, and support documentation tailored to non-technical users, reducing recurring queries and supporting staff across organisational transitions the same user-centred documentation approach required for teacher support materials
- Coordinated and formally documented the ARMANI task force training, producing meeting minutes and structured implementation records that supported accountable, traceable field operations

SECTORS

Education / EdTech

NGO / Development

WASH / Humanitarian

Private Sector IT

- GardaWorld Rwanda · Kigali
- Managed uptime-critical IT infrastructure across multiple sites, applying preventive maintenance discipline that reduced downtime by 45% demonstrating structured operational follow-through in resource-constrained, multi-location environments
 - Delivered technical training to non-technical operators and security staff, building fault awareness and measurably reducing repeat support requests experience that directly informs practical teacher coaching and troubleshooting support
 - Maintained comprehensive operational documentation including inspection logs, fault reports, and maintenance schedules sustaining institutional continuity across personnel and shift transitions
 - Planned and executed network cabling installations for new sites, ensuring standards-compliant physical infrastructure from planning through to handover

IT Systems Operator

Ameki Color Rwanda

May 2019 – Dec 2020

- Maintained production systems and enterprise software in a manufacturing environment, developing structured fault-diagnosis and escalation habits under operational pressure
- Implemented access controls and security hardening across company hardware and internal systems
- Performed preventive maintenance on business-critical hardware, reducing unplanned downtime

Relevant Projects

ARMANI Endline Assessment: Field ICT Coordination

WaterAid Rwanda · Bugesera District

Mar 2026

- Designed and led the full ICT workflow for a multi-site field assessment: platform configuration, enumerator training, real-time data quality monitoring, and pre-submission validation across 50+ participants
- Produced formal training documentation, task force meeting minutes, and implementation records supporting accountability and replication of the data collection model

Nadol Eden Farm: Digital Platform & Content Infrastructure

Personal / Entrepreneurial · nadoledenfarm.com

2025 – Present

- Designed and deployed a production website including hosting, domain management, frontend architecture, content organisation, and deployment workflow demonstrating end-to-end digital platform ownership from planning through to go-live
